

## The Freight Landscape: New York, Los Angeles and Paris

- A** (High Density Convergence):  
>Commercial and financial districts.
- B** (Employment-based Divergence):  
>Manufacturing and warehousing districts.
- C** (Population-based Divergence):  
>Residential districts.
- D** (Low Density Convergence):  
>Suburbia.

Quantile classification of two density axis (population and employment)  
Four population (P1 to P4) and employment (E1 to E4) classes

N = Number of statistical units  
D = Divergence Index
